BioCare Solutions for Oxygen Therapy Systems:

The Respiratory market is a main focus of the BioCare Business Unit. Our team of engineers work with all aspects of this segment to improve oxygen therapy systems with the ultimate goal of enhancing patient care and quality of life. With the application of new technology BioCare can create innovative solutions for oxygen therapy systems.

BioCare Business Unit provides innovative products and solutions for both liquid and compressed oxygen therapy systems. Our components and sub-systems will perform critical functions including reliable connection, oxygen conserving, and flow control.

BioCare Oxygen Therapy Solutions

- Custom Product Integration
- Applying New Technology
- Liquid Oxygen Systems
- Compressed Oxygen Systems
Providing innovative products and solutions for liquid and compressed oxygen therapy systems.

**LOX Quick Connectors**
- Interchanges with other LOX couplings
- "Anti-freeze-on" technology (patent pending)
- Quick connections for LOX humidifying systems

**LOX Vent Valves**
- Portable oxygen delivery systems

**LOX Ball Valves**
- Stationary liquid oxygen sources

**LOX Vent Valves with Connectors**
- Custom configurations

**System Solutions**
Parker brings more than 50 years of experience in engineering fluid flow and motion control systems, sub-systems, and assemblies.

- Custom Product Integration
- Improved Performance
- Reliability

**Engineering Expertise**
Beginning with concept and support through release to production, Parker BioCare engineers will assist you with:

- Collaborative Design
- Compliance with Industry Standards
- Optimizing Resources
- Applying New Technology

**Liquid Oxygen**
Parker components and sub-systems perform critical functions including:

- Reliable Connection
- Oxygen Conserving
- Flow Control
- Fluid Vaporizing

**Compressed Oxygen**
Parker components and sub-systems perform critical functions including:

- Reliable Connection
- Flow Control
