

### Features:

- Supplies continuous power to sensors.
- Used with IEC/UL 508 Class 2 power supply.
- Easy upgrade eliminates the need for battery replacement.
- Extends temperature operating range over batteries.
- FCC, IC, and CE certified when used with SensoNODE products.

| Technical Data    |                          |
|-------------------|--------------------------|
| Part Number       | SNWP2-B                  |
| Wire Length       | 9.8 ft [3m]              |
| Temperature Range | -40° F-185° F            |
| Input Power       | 5-36 Volts DC            |
| Output Power      | 3 Volts DC               |
| Connection        | Flying lead 24 AWG Wires |
| Form              | CR123A Battery           |
