RE: Parker Velcon CDFX™

To Whom It May Concern:

Having fully reviewed the data presented as a result of extensive internal and external robustness testing, members of the Energy Institute Aviation Fuel Filtration Committee (EI AFFC) on Wednesday (Feb 12) approved the Parker Velcon CDFX™ for field trials. The Parker AFD team is pleased to receive the committee's vote of confidence in allowing our CDFX™ Water Barrier Technology to progress to field trials at into-plane fueling locations.

Our team is working closely with JIG and A4A to support the field test protocol and trials of CDFX at airports globally. We will supply CDFX elements and support for locations specified by A4A and JIG. Furthermore, plans are in place to establish full production capacity to meet the demand for a drop-in solution when the field trials are complete.

Stay tuned for more updates. Please forward this announcement to your contacts that can benefit from this news. Should you have any questions, contact our customer service team at velconcs@parker.com

Should you have any questions, please contact your Parker AFD Sales Representative or our Customer Service team at (719) 531-5855 or e-mail velconcs@parker.com.
