

Table of Contents

Introduction	1
The Evolution of Compressed Air	3
Chapter 1 Safety	7
Safety	9
Ejected Particles	9
Noise	9
Hearing Loss Incident	11
Leaks	11
Air Embolism Incident	13
Other Pneumatic Safety Risks	13
Analysis of Previous Elevator Explosions	14
Pneumatic Component Safety	14
Quiz Questions	15
Chapter 2 Introduction to Compressed Air	17
Objectives	19
What is Pneumatics?	19
Gases	19
Pressure Scales	22
Gage Pressure Scale	22
Measuring Atmospheric Pressure Absolute Pressure Scale	22
Vacuum Pressure Scale	22
Gas Laws	22
Pascal's Law: The Transmission of a Force Through a Fluid or Gas	23
Boyle's Law: The Relationship Between Pressure and Volume	24
Charles' Law: The Relationship Between Temperature and Volume	25
Heat Energy	26
Ideal Gas Law	27
Modified Ideal Gas Law	27
Air Compression	28
Air Expansion	28
Pneumatic Transmission of Energy	29
Inefficiency in a Pneumatic System	30
Heat of Compression	30
Friction	31
Changing Fluid Direction	31
Free Air vs. Standard Air	31
Free Air vs. Compressed Air	32
Flow Rate	33
Velocity of Air	33
Critical Velocity	33
Pneumatic System Design	34
Review	34
Chapter 2 Quiz Questions	35

Chapter 3, Symbols	37
General Characteristics of Symbols	39
Lines	40
Circles, Semi-Circles, Squares, Rectangles and Diamonds	40
Miscellaneous Symbols	41
Energy Conversion Components	41
Compressors and Vacuum Pumps	41
Motors	42
Cylinders	42
Single-Acting Cylinders	42
Double-Acting Cylinders	43
Control Valves	43
Flow Paths	43
Directional Control Valve Designations 2/2 or 3/2	44
4/2 Directional Valve	44
4/3 4-port and 5-port Directional Valve	44
Activation Methods	44
Manual Controls	45
Mechanical Controls	45
Electrical Controls	45
Pressure Controls	45
Combined Controls	46
Non-return Valves Check Valves	46
Shuttle Valve and Quick Exhaust	46
Pressure Control Valves	47
Pressure Relief Valves	47
Sequence Valve	47
Pressure Regulator Valve	47
Flow Control Valves	48
Shutoff Valve	48
Source of Pressure	48
Prime Movers and Power Takeoffs	48
Receiver	48
Fluid Conditioners	49
Exhausting Air	50
Chapter 3 Quiz Questions	51
Chapter 4, Actuators	53
Actuators	55
Cylinders	55
Cylinder Construction	56
Seals	57
Rodless Cylinders	58
Energy in Pneumatic Actuators	59
Cushions	60
Cylinder Mounting	61
Air Bellows	61
Cylinder Calculations	62
Force Requirements	62
Sizing a Cylinder	62
Actuator Speed	66
Air Consumption Calculations	67
Rotary Actuators and Motors	70
Rotary Actuators	70

Pneumatic Motors	71
Advantages of Air Motors	72
Disadvantages of Air Motors	73
Motor and Rotary Actuator Selection	73
Rotary Actuator Selection	73
Pneumatic Motor (and Vane Actuator) Selection	74
Motor Speed	75
Summary	77
Chapter 4 Quiz Questions	78
Chapter 5, Control Valves	79
Control Valves	81
Objectives	81
Valve Types	81
Poppet Valve	82
Spool Valves	82
Valve Port Numbering	83
Directional Control Valves	83
2/2 Valves	83
3/2 Valves	84
3/2 Poppet Valve	84
4/2 Valve	85
5/2 Valve	85
Three-Position Valves	85
Dual Pressure Circuit	86
Valve Activator (Operator) Types	87
Multi-Activator Valves	88
Air Valve Selection	88
Selecting Air Valves Using C_v	90
Selecting Air Valves Using ISO C	92
Other Control Valves	93
Check Valves	93
Flow Control Valves	93
Fixed Restrictions	93
Variable Restrictions	93
Flow Control Valve With Bypass	94
Shuttle Valve	94
Quick Exhaust Valve	95
Pneumatic Pressure Switch	95
Pneumatic Timer	95
Silencers	96
Summary	97
Questions	98
Chapter 6, Pneumatic Circuits	99
Circuit Design / Basic Circuits	101
Objectives	101
Design Principles	101
Circuit Diagrams	101
Circuit Layout	101
Cylinder and Valve Identification	102
Lettering System	102
Numbering System	102

Table of Contents

Basic Circuits	103
Single-Acting Cylinder Circuits	103
Controlling Cylinder Speed	104
Double-Acting Cylinder Circuits	105
Controlling Cylinder Speed in a Double-Acting Circuit	106
Quick Exhaust Valves	107
Rapid Approach / Slow Feed	108
Remote Circuits	109
Automatic Circuits	110
Semi-Automatic Circuit	110
Fully Automatic Circuit	111
Time Delay Circuits	112
Pressure Dependent Sequential Circuits	113
Sequential Control 1	114
Sequential Control 2	115
Summary	116
Design Principles	116
Single-Acting Cylinder Circuits	116
Double-Acting Cylinder Circuits	116
Chapter 6 Quiz Questions	117
Chapter 7, Air Preparation	119
Objectives	121
Air Preparation	121
Contaminants in a Pneumatic System	121
Filters	123
Air Line Filters	123
Filter Elements	124
Mechanical Filter Elements	125
Depth Type Elements	125
Edge Type Elements	125
Filter Element Nominal Ratings	125
Filter Ratings in Practice	125
Sizing Filters	126
Filter Bowls and Bowl Guards	126
Coalescing Filters	127
How a Coalescing Filter Works	127
Special Filters	127
Pressure Regulators	128
Regulator Construction	128
Diaphragm Regulator	129
Piston Regulators	129
Regulator Operation	129
Non-Venting Regulators	130
Lubrication	130
Oil Mist Lubricators	131
Recirculating Lubricator	132
Testing for Correct Lubrication Level	133
Filter - Regulator - Lubricator	133
Mixed Air	134
Selecting FRLs	134
Summary	135
Chapter 7 Quiz Questions	136

Chapter 8, Solenoids and Electronic Control.....	139
Introduction	141
Objectives	141
Basic Electrical Principles	142
Operating Solenoid Valves	143
Relays	143
Electrical Inputs or Control Elements	143
Relay Contacts	144
Pushbuttons	144
Selector Switch	144
Limit Switches	144
Magnetic Reed Switches	145
Hall Effect Switch	145
Proximity Switch	145
Optical Switches	146
Pressure Sensors	146
Normally Open / Normally Closed	147
Toggle Switches	147
Basic Electrical Circuits	147
Single-Acting Cylinder Circuit	147
Single-Acting Cylinder Circuit 'OR' Function	148
Single-Acting Cylinder Circuit 'AND' Function	148
Double-Acting Cylinder Circuit	148
Semi Automatic Double-Acting Cylinder Circuit	149
Fully Automated Double-Acting Cylinder Circuit	149
Monostable Circuit	149
Bi-stable Circuit / Latching Circuit	150
Sequential Control - 2 Cylinders	151
Sequential Control - 2 Cylinders (Cascade)	152
PLCs	153
Summary	155
Chapter 8 Quiz Questions	156
 Chapter 9, Pneumatic Logic.....	 157
Objectives	159
Overview	159
Pneumatic Logic Valves	159
Signal Valves, Sensors and Timers Signal Valves	160
Indicators	160
Sensors	160
Bleed Sensor and Relay	161
Logic Valves	162
'OR' Function	162
'And' Function	163
'NOT' or Inhibition Function	164
'YES' Function	165
Timers	166
Memory Function	166
Sequential Control	167
Introduction	167
Grafcet	168
Operation of Sequencers	169

Basic Sequential Operation	170
Operation of the Sequential Circuit	170
Other Logical Functions	171
Summary	172
Chapter 9 Quiz Questions	173
Chapter 10, Compressed Air Production and Distribution	175
Objectives	177
Compressors	177
Reciprocating Compressor	177
Diaphragm Compressor	179
Rotary Vane Compressor	179
Rotary Screw Compressor	179
Lobed Rotor	180
System Demand	180
Standby Capacity	180
Output Control of Compressors	181
Future Air Requirement	181
Air Receivers	182
Summary - Compressors	182
Receivers	183
Air Preparation	183
Objectives	183
Moisture	183
Aftercoolers and Dryers	184
Deliquescent or Absorption Dryer	185
Desiccant or Adsorption Dryer	185
Point-of-Use Desiccant Dryers	186
Refrigerated Dryer	186
Membrane Dryers	187
Concerns with Dryers	188
Filters	188
Intake Filters	188
Air Distribution	188
Objectives	188
Plant Installation	188
Pipework - Mainline	190
Branch Line	191
Control Systems	191
Bracketing / Supports	192
Leakage	192
Summary	193
Chapter 10 Quiz Questions	194
Glossary	197
Appendix A, Reference Material	205
Gas Laws / Formulae, Pneumatic Principles	207
Units of Measure	208
Appendix B, Compressed Air Standards and Applications	215
Index	217
